BREED THEATRE.

The Spy's Defeat, Wonderful Two-Reel
Essanay Feature Picture.

There is a powerful story at the
Breed today entitled The Spy's Defeat,
told in two reels and produced by the
peerless Essanay company. It tells of
life in court circles of Russia at the
time the Franco-German war broke
out. It is full of strategy and diplo-
macy. Life is represented clearly. Bio-
graph cast, holds the undivided atten-
tion of the audience by its thrilling,
sensational acting, while The Sacrifice,
Kalem, and Building the Dog
House, Vitagraph, furnish the balance
of the bill.

SOUR MILK FOR

WHITE DIARRHOEA

Connecticut Agricultural College Makes
Pertinent Suggestions Regarding the
Management of Young Chicks.

(Extract Prepared by J. Olin Howe.)

Prof. Elie Metchnikoff has success-
fully demonstrated the efficacy of sour
milk in prolonging human life and
now the Agricultural Experiment sta-
tion at Storrs, Conn., has adapted it
to use in the fight against the dis-
ease known as white diarrhoea in
chickens, which was causing the loss
of the poultry industry in this country
when the Storrs Experiment sta-
tion took up the subject. According
to Prof. Raymond Perdue, head of the
college, one of the foremost poultry
authorities, often as many as ninety
per cent. of chicks hatched died from
this disease within the first three
days or four days out of the shell
and an average of fifty per cent. of
the chicks hatched in the United
States were its victims.

The Storrs scientists have gone far
toward conquering this enemy, how-
ever, and in a bulletin just issued Dr.
L. F. Retger of Yale and Prof. W. F.
Kirkpatrick of the Connecticut college
tell interestingly of the experiments
which have led to the knowledge of
the efficacy of sour milk as a specific
in the rout of white diarrhoea. P.
Stoneburn's name is also on the title
leaf of the bulletin, he having pre-
ceded Prof. Kirkpatrick in the college
poultry department.

When the Storrs station took up this
subject authorities differed as to the
cause of the trouble, and even long
after Prof. Retger isolated the bac-
terium pullorum, which causes the dis-
ease, there were varying theories re-
garding it. The Storrs experimenters
have established the existence of this
bacterium in the ovary of the mother
hen as the beginning of the trouble,
however, and that chicks from infected
eggs have the disease when hatched
within the first three or four days,
but probably not after that. Even if
infected chicks live, they are usually
stunted and weak and poor layers—
this was the case until the experi-
ments with the lactic acid bacteria
in sour milk.

Previous work has been by way of
the establishment of the Storrs sta-
tion's hypothesis on firm ground and
this new bulletin carries the work on
into the field of how the infection is
spread, how to treat infected birds and
how to rid a flock of the infection, it
has been learned that mature stock

Want To Feel Young?

It's Olive Tablets For You!

Beware of the habit of constipation.
It develops from just a few constipated
days, especially in Old People, unless
you take your medicine in hand.

Coax the jaded bowel muscles back
to normal action with Dr. Edwards' Olive
Tablets, the substitute for calomel.
Don't force them to unnatural
action, with severe medicine, or by
merely flushing out the intestines with
nausea, sickening cathartics.

Dr. Edwards believes in gentleness,
persistence and Nature's assistance.

Dr. Edwards' Olive Tablets act on the
bowels; their action is gentle yet pos-
itive. There is never any pain or griping
when Olive Tablets are used. Just
the kind of treatment old persons
should have.

Take Olive Tablets mixed with olive
oil and have no trouble with your
bowels or stomach.

"Every little Olive Tablet has a
movement all its own." 10c and 25c
per box.

The Olive Tablet Co., Columbus, O.

can receive the infection from hen to
hen and also by means of infected lit-
ter in the houses, and most interest-
ingly the accounts of the experi-
ments through which these facts have
been established.

For the complete elimination of the
disease from a flock breeding must be
looked to and eggs or livestock ob-
tained from strains known to be free
from the infection, but the sour milk
diet has been proven most effective in
prevention of the spread of the dis-
ease and to enable individual birds to
grow and develop and become healthy
and vigorous despite the infection.

The bulletin lays proper stress on
the necessity for keeping stock free
from the infection and contains this
pertinent paragraph: "It should be
considered both a moral and legal
duty for persons to sell or exchange
eggs, chicks or mature stock which
come from flocks that they knew to
be infected with the germ of bacil-
lary white diarrhoea."

The work at Storrs and New Haven
has given the poultry industry in this
country a new lease of life. A number
of incubator manufacturers who were
considering retiring from the business
have decided on the expenditure of a half
million dollars for the increase of
manufacturing facilities since it be-
came clear that the experiments were
successful in establishing the cause
and remedy for the disease. The value
of the work thus quickly done is re-
cognized far outside Connecticut.
